"Those who have the gold make the rules"

WHAT CAN YOU DO?

- Make all you can. Never be jealous of someone else when you can be just as successful.
- As Americans, we still have the freedom to choose our course in life. Don't waste a right that others have fought and died for.
- Never assume that you have to settle for what you have when deep down you know you have the passion to fight for your best in action.

As dry as it has been it may be a good idea to startup your sprinkler system early this year to minimize killing of trees, plants and your lawn. You may need to re-winterize it again, but the benefits far outweigh the possible problems.

Hand Watering

If you have the time, hand watering with your hose may be an option. Be sure to remember to disconnect your hose from your outside faucet until April 1st. After that date, the chance of a hard freeze is very minimal.

Sprinkler Problems

Broken lines, crushed sprinkler heads and bad valves can multiply during the winter months, causing you great frustration at this time of the year. You can't spot and fix each problem as it happens when you're not using the system every day.

The Positive Side

Lawn sprinklers and drip systems really do save you time once you get them functioning properly. If you have a problem on a particular zone or valve, you can usually elect to bypass that section and have your system water the other sections until you can get around to fixing the problem zone.

Calling a professional is another way of transferring your frustrations to someone else who would be glad to help you with your problems.

Need Some Good Luck?

By Joseph Prescia

Economy got you down? Someone once said, "Luck is what happens when preparation meets opportunity." One of the greatest times to start a new business is when times are tough. Individuals that start a business on a shoestring budget in a down economy are more apt to succeed because they have learned how to keep expenses down.

It's easy to make money, but it's very hard for some to be able to hold on to what they make.

The Blame Game

Too many people are pointing fingers at who's to blame for this economy. May I suggest that is the wrong way to view a problem? The right way to look at this problem is to ask, "What can I do to make something positive happen?" Too many look to others for answers when

they have the ability to figure it out for themselves and be very successful.

You Don't Need Luck

You simply need to prepare your mind for success. If you are blaming others then YOU are part of the problem. Opportunities abound in ANY economy. It's up to you to deliver. 300 million Americans are in need of some type of product or service. Will you be the one to provide what they need in your neighborhood?
